

Particles, Universe, NuClei and Hadrons for NFDI

Thursday, 20 April 2023 11:30 (30 minutes)

PUNCH4NFDI is the NFDI consortium of particle, astro-, astroparticle, hadron and nuclear physics, representing about 9.000 scientists with a Ph.D. in Germany, from universities, the Max Planck Society, the Leibniz Association, and the Helmholtz Association. PUNCH physics addresses the fundamental constituents of matter and their interactions, as well as their role for the development of the largest structures in the universe - stars and galaxies. This talk will provide a brief overview over the ongoing activities.
